Escalation image is a temporary release delivery of fix until next CCO release is available. **Customers are requested to migrate to next CCO release when fixes are made available.** We request you to drop a note to "wnbu-escalation@cisco.com" with TAC Case #, Escalation image version, Bug affected where escalation image is used and what scale the deployment happen (AP, WLC, Client count). Any feedback would be appreciated either via TAC or this alias.

8.10.181.3 is an Escalation build published from the 8.10.181.0 CCO image and it is an engineering special that resolves the following additional caveat(s):

8.10.181.3

CSCwd37092 Slow TCP downloads, failing TLS authentications in 8.10.181.0/17.3.6 - 2800/3800/4800 series
CSCwc78435 9130 sending incorrect channel list on out of band DFS event causing client connectivity issues

ENGINEERING SPECIAL USE DISCLAIMER

This code is supported by the TAC organization. Please report all comments, suggestions, and problems about this code directly to wnbu-escalation@cisco.com. If you are satisfied with the solution, please inform the alias.

Contact wnbu-escalation@cisco.com with any questions.
